

→ Wireless Digital Extension for XD10 and XD26

- Wireless RF transmission of up to 8 digital inputs
- Use with Linx Technologies Keyfob transmitters at 418 MHz
- Transmission distances up to 100 feet
- Power supply via the controller
- Built-in antenna

Remote module

Part numbers

Type	Description	Supply	Part No.
XT01	Wireless digital extension	100-240 VAC controllers	88970826
XT01	Wireless digital extension	24 VDC controllers	88970881

General characteristics

Environmental characteristics

Certifications: complies with limits for Class A digital device pursuant to Part 15 of the FCC Rules.

Operating temperature: -20 → +55°C

Storage temperature: -40 → +70°C

Protection: IP20

Input characteristics

Input type: 8 digital

Receiver frequency: 418 MHz

Maximum range: 1000 feet

Typical range: 100 feet

Transmitter parameters

Type: Linx type MS Keyfob Transmitter or compatible

Number of buttons: 1 to 8

Comments

* See installation instructions for program example and transmitter setup.
