<<Outline>>
Smartphones and tablet PC that equip nano SIM (4FF SIM) cards are increasing in these days.
The SF72 Series is a push-push type nano SIM card connector ideal for those applications.
(SIM: Subscriber Identity Module)

Features

- 1.25mm height, 11.2mm width, and 14.35mm depth, industry’s lowest-in-class height and smallest-in-class dimensions among the same type of connectors.
- Maintaining good operability with the enlarged card eject length (3.9mm).
- With card mis-insertion measure and card detection switch (normal open).
- Structure that enables visual check of terminal area after SMT mounting.
- Balanced EMI countermeasure through 8 hold-down points.
- Pb-free, halogen-free compliant product.
- Supports automated mounting with embossed tape.

General Specifications

- No. of Contacts: 6 pos.
- Contact Resistance: 100mΩ max. (initial)
- Dielectric Withstanding Voltage: AC500Vr.m.s for 1 minute
- Operating Temperature: -25 Deg. C to +85 Deg. C
- Rated Current: 0.5A / terminal
- Rated Voltage: 10V / terminal
- Durability: 5,000 times

Ordering Information

SF72 S 006 V B A (R2500)

- **Series**: SF72
- **Connector Type**: S: NON-ZIF structure
- **No. of Contacts**: 006
- **Modification Code**: V: With Hold-down for SMT mounting
- **Reeled Product (Note1)**: Note1: An embossed tape reel contains 2,500 pieces.
  For emboss taping specifications, please contact us directly.
- **Plating Specification**: B: Au / Au flash plating

Note 1: An embossed tape reel contains 2,500 pieces.
For emboss taping specifications, please contact us directly.

**Notice:**

1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.
2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE’s products to the equipment.
3. The products presented in this brochure are designed for the uses recommended below. We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

(1) Applications that require consultation:
   (i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:
       - Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.
   (ii) We may separately give you our support with a quality assurance program that you specify, when you think of a use such as:
       - Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:
   - Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc.
