## Datasheet

# 100 → 200W Electronic Lighting Transformer, 230V ac, 12 V

RS Stock 714-1385

### Dimensions: (mm)

ENGLISH

## Specification

- IP20 independent transformer, for halogen lamps 12 V.
- Class II protection against electric shock following direct or indirect contact.
- Complete with terminal cover and cable retainer.
- Opposite inlet and outlet terminals.
- Input terminals with loop possibility on feed.
- Double terminal block on the 230 V primary circuit (2,5 mm<sup>2</sup> terminal area).
- Triple terminal block on the 12 V secondary circuit (2,5 mm<sup>2</sup> terminal area).
- Clamping screws on primary and secondary circuits for cables with diameter:  
3 mm min. - 8 mm max.
- Max 18 mm cable peel-off.
- The transformer is secured by means of threaded slots.
- Protected against overheating and short-circuits.
- Protected against mains voltage spikes.
- Protected against overloads.
