

Magnetic Proximity Sensors (Hall Effect)

MP1021 Sensors

Digital Hall-effect position sensor in low-profile flange-mount housing

Description

The MP1 Series sensors are one-piece non-contact solid-state position sensors. The sensors operate through the use of Hall Effect technology with magnetic fields generated by permanent magnets. They provide a sinking current output.

Features

- Solid state reliability
- Flange-mount housing
- Stable output over operating temperature range
- Compatible with unregulated power supply
- Open collector (NPN) output can be used with bipolar or CMOS logic circuits with suitable pull-up resistor
- North pole sensitive
- Unipolar device (MP102103), (obsolete – MP102102, MP102103)
- Latching versions (obsolete – MP102104, MP102105, MP102106)
- RoHS compliant
- IP67

Typical Applications

- Door position & interlock
- Limit switch
- Flow/speed
- Home security
- Pedal switch
